Your Newsletter—A Jaundiced View—Winter, p. 33—Gilbert, Joan

**A**T THIS POINT, I reveal myself in my true colors, as a stick-in-the-mud. I hold a number of beliefs that have been repudiated by the liveliest intellects of our time. I believe order is better than chaos, creation better than destruction. I prefer gentleness to violence, forgiveness to vendetta. On the whole I think that knowledge is preferable to ignorance, and I am sure that human sympathy is more valuable than ideology. I believe that in spite of the recent triumphs of science, men haven't changed much in the last two thousand years; and in consequence we must still try to learn from history. History is ourselves. I also hold one or two beliefs that are more difficult to put shortly. For example, I believe in courtesy, the ritual by which we avoid hurting other people's feelings by satisfying our own egos. And I think we should remember that we are part of a great whole, which for convenience we call nature. All living things are our brothers and sisters. Above all, I believe in the God-given genius of certain individuals, and I value a society that makes their existence possible.

—Kenneth Clark
